SUMMARY

Full Stack Developer (React, Node.js, TypeScript) with 1+ year of experience (full-time and internships) building responsive web apps and REST APIs. Built an advanced RAG system with hybrid retrieval and reranking, a browser-based code playground, and a Tailwind config extraction tool.

PROFESSIONAL EXPERIENCE

Namami Infotech Pvt. Ltd. **Jun 2026 – Present**
Full Stack Developer *India*

- Develop and maintain full-stack features using **React, Node.js/Express and MongoDB**, from UI to REST API and database.
- Build and integrate **REST APIs** with authentication and validation, and collaborate with the team on code reviews and releases.
- Optimize frontend performance and fix production bugs to keep the application stable and responsive.

Webmaska **Jul 2025 – Jan 2026**
React Intern *Gurugram, Hybrid*

- Built production-ready **React components** from design specs, fully responsive from **320px to 1440px**.
- Used **React memoization hooks** to remove unnecessary re-renders, improving page load speed by **30%**.

Rifcare Tech Pvt. Ltd. **Feb 2025 – Jul 2025**
Software Developer Intern *Gurgaon, Offline*

- Developed scalable **Node.js/Express REST API modules** for internal product features.
- Wrote middleware for **authentication, request validation and endpoint rate limiting**; reviewed team code to keep production stable.

PROJECTS

Bhagavad Gita RAG AI | *React, Node.js, TypeScript, Qdrant, BM25, Cohere, Gemini, Jina*

- Built an advanced **Retrieval-Augmented Generation** app with a **Node.js/TypeScript API** and React frontend to answer questions grounded in the Bhagavad Gita.
- Implemented **hybrid retrieval** combining **Qdrant** vector search (semantic) with **BM25** (keyword), merged using **Reciprocal Rank Fusion (RRF)**.
- Added **Cohere reranking** to improve passage relevance; evaluated **Jina and Google Gemini embeddings** at different stages to improve retrieval quality.

Tailwind Config Extractor | *Node.js, Express, MongoDB, Browser Extension*

- Built a browser extension and web app that inspects a live page and generates a custom **tailwind.config.js** from its CSS.
- Created backend APIs to extract design tokens (**colors, fonts, font sizes, spacing**) into reusable JSON schemas.
- Implemented **JWT cross-origin authentication** and MongoDB storage so users can save extraction history.

Front Arena | *React, TypeScript, Redux Toolkit, Tailwind CSS, Monaco Editor*

- Built a browser-based playground to write and run **HTML, CSS and JS** in real time inside an isolated sandbox.
- Integrated **Monaco Editor** with input debouncing, reducing event-loop latency by **40%** during fast typing.
- Designed a **multi-file workspace** with dynamic file-tree state management, similar to a real IDE.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, SQL
Frontend: React.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, JWT Authentication
AI / Search: RAG, Qdrant, BM25, Hybrid Search, RRF, Reranking, Embeddings
Databases & Tools: MongoDB, SQL, Git, GitHub, Vercel

EDUCATION

Deenbandhu Chhotu Ram University of Science and Technology **2022 – 2025**
B.Tech in Computer Science and Engineering *Haryana, India*

Birla Institute of Technology **2019 – 2022**
Diploma in Computer Science and Engineering *Jharkhand, India*
